DETAILED ACTION

Status of Claims

Claims 1-20 are pending.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Response to Restriction

Applicant's election with traverse of Group I in the reply filed on 07/22/05 is acknowledged. The traversal is on the ground(s) that the restriction requirement is misplaced because the Examiner has not provided any proof of serious burden that would exist absent the restriction. This is not found persuasive because contrary to applicant's assertion, the wide disparity between the various groups, for example the

polymer composition and compounds of formula (I) requires that many divergent fields must be searched, including but not limited to class 524, subclass 115, 116, 117, 121, 126, 129, 131, 132 and 133. Additionally, the compositions contain active ingredients, which are variously classified based on the nature of the exact co-ingredients employed. Furthermore, the three distinct groups or inventions as claimed herein can support their own patents. Thus, the withdrawn polymer composition of Group II is recognized in the art as being distinct from the compounds of Group I because of their chemical properties, different effects and reactive conditions (MPEP 806.04 and MPEP 808.01. All of the reasons above constitute an undue burden on the Examiner.

New claims 19 and 20 will be combined with Group I, thus, Group I becomes claims 1-3 and 19-20.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 5-222256.

Applicants claim compounds of structural formula (I), wherein the substituents are as defined in claim 1.

Art Unit: 1626

JP5-222256 discloses an identical compound. See page 3, compound number 2 between lines 0012 and 0013.

Allowable Subject Matter

Claims 2-3 and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
